OVERVIEW
[CUSTOMER REVIEWS \(804\)](#)
[SPECIFICATIONS](#)
[Report Item](#)

Some of the chips have a bios that does not allow the flash mode 'QIO'. Changing it to 'QOUT' fixed it for all of them.

Introduction: ESP32 is already integrated antenna and RF balun, power amplifier, low-noise amplifiers, filters, and power management module. The entire solution takes up the least amount of printed circuit board area. This board is used with 2.4 GHz dual-mode Wi-Fi and Bluetooth chips by TSMC 40nm low power technology, power and RF properties best, which is safe, reliable, and scalable to a variety of applications. Features: High performance-price ratio Small volume, easily embedded to other products Strong function with support LWIP protocol, Freertos Supporting three modes: AP, STA, and AP+STA Supporting Lua program, easily to develop

Very fast shipping. Thanks to the team. I recommend this seller. Small detail. It does not fit on the L293 motor shield and even less on the bread board.

The parcel reached Germany in 35 days. The product externally corresponds to the description, the functionality has not yet checked. On one of the modules on the lid is a clear Dent, see if it will work. Many thanks for the prompt delivery! 04 Dec 2019 12:40
