Difference between DP,DPS and DPH	<p>1.DPS series are updated version. Panel is different. In DPS series, we change the M1/↑and M2/↓ into V/↑and A/↓. You can set the voltage and current fast. We add a new function “set default boot open or close output” Others are not changed.</p> <p>2.All those power supply can charge the battery directly, don't need external diode. When charging battery, don't connect the battery reversely , otherwise, power parts will burn.</p> <p>Find the difference between DPS and DP see this video https://www.youtube.com/watch?v=ptt931rrXo8</p> <p>3.DP power supply and DPS power supply are all buck (step-down) converter. But DPH3205 and DPH5005 is buck-boost converter.</p>
